Rising landfill costs and raw material prices, along with the necessity to separate waste, make recycling and sorting building materials not only environmentally necessary, but also cost-effective for construction companies. Mobile crushers enable profitable recycling of asphalt, concrete, and demolition debris, as well as the processing of natural stone. The GCV70.92 compact mobile crusher offers excellent mobility and a high degree of user-friendliness due to its numerous technological features. Versatile adjustment options ensure high-quality final grain and increased usability.
